VIVA Med (ViVA Medical Center)

Tashkent

Main Frontend Developer

CRM system.

Led frontend development efforts, providing direction and mentorship to junior developers while building the core features of the application.

Focused on React, Next.js, and TypeScript to create fast, scalable, and responsive web applications. Worked on optimizing performance, reducing load times, and improving the overall efficiency of the application through code splitting, lazy loading, and efficient state management.

Conducted regular code reviews, ensuring high-quality code and adherence to best practices across the development team.

UTAS (Tashkent University of Applied Sciences)

Tashkent, www.utas.uz

Web developer

Lead frontend development, project structure design, and implementation of new technologies for multiple web applications.

Played a key role in architecting frontend solutions and ensuring that the application is scalable, maintainable, and performs well across different platforms.

Worked closely with designers to ensure the UI is user-friendly and visually appealing, using tools such as Figma to create and iterate designs.

Implemented React and Next.js for developing dynamic, high-performance applications and utilized MongoDB for backend data management.

Introduced new tools and frameworks to improve development workflows, including Redux for state management and Webpack for bundling.

Driver's license category B

Further information

About me

I have been engaged in web programming since 2021, an expert in a wide range of technologies including HTML, CSS, JavaScript, TypeScript, React, NextJS, NodeJS, and more. My main focus is front-end development, but I have experience in backend, mobile app development, and web design. I worked on several projects for different companies, delivered high-quality solutions and created more than 10+ successful projects.
